✚ ACKNOWLEDGEMENT

The First we would like to express my special thanks of gratitude to my teacher **SIR HASSAN NAEEM** who helped a lot in finalizing this project within limited time frame , valuable counseling and assistance for the accomplishment of this project.

Secondly, we would also like to thanks the e-project team at **Aptech Head Office**, who gave us the opportunity to do this interesting and wonderful project about **LAWYER WEBSITE**

Thirdly, we also thank the e-project team for giving this task to us. Following are the benefits of this Project:

- Re-enforcement of skills happens in the experimental learning process.
- A mentor, ensuring that we do not get drifted, constantly guide us.
- It gives us a lot of confidence to face an interview as we have worked on a project. We can explain virtually everything on the subject we have learnt.

✚ Introduction

Today everyone need legal services for some or the other reason. It is very difficult to find lawyers with respective specialization. Getting appointment is also very difficult. There is a need to have a website for doing all this.

✚ Proposed Solution

We need to design and develop a website for lawyers and their service. User's can register and search for lawyers basing their requirement. Info related to lawyers will be there in website which customers can browse through and view their profile before contacting them.

MODULES

✚ User Types

- **Admin:** Admin dashboard to manage information that will be seen in homepage and manage lawyer profiles need to be seen for searches. Manage schedules and approved booking slots
- **Customer:** Registration , login , case form to search for lawyer services based on requirement.
- **Lawyer:** Apply for lawyer, log in , lawyer dashboard for view or approved user cases.
